

FRONT-END DEVELOPMENT

CSS

****Ways to Add CSS****

- Inline (style attribute inside HTML tag)
- Internal (using `<style>` tag inside `<head>`)
- External (linking a separate CSS file using `<link>` tag)

****Selectors****

- Element selector (e.g., `p`, `h1`)
- Class selector (`.classname`)
- ID selector (`#idname`)
- Grouping selector (e.g., `h1, p, div`)
- Descendant and child selectors (e.g., `div p`, `div > p`)

****Text and Font Styling****

- color
- font-size
- font-family
- text-align
- font-weight

****Box Model****

- margin
- padding
- border
- width
- height

****Background and Borders****

- background-color
- background-image
- border-style
- border-radius

****Units in CSS****

- px
- %
- em
- rem
- vh
- vw

HTML

Basic structures

- `<html>`
- `<head>`
- `<title>`
- `<body>`

Text Formatting Tags

- `<h1>` to `<h6>`
- `<p>`

<hr>

Links & Media

 – anchor/link tag

image

<video>

<audio>

Lists

Tables

<table>

>tr>

<td>

<th>

Forms

<form>

<input>

<textarea>

<select>

radio button

Semantic Tags

<header>

<nav>

<main>

<section>

<footer>
